

PL/pgSQL (Trigger)

CREATE Trigger

- ```
CREATE FUNCTION trigger_function()
 RETURNS TRIGGER
 LANGUAGE PLPGSQL
AS $$
BEGIN
 -- trigger logic
END;
$$
```
- ```
CREATE TRIGGER trigger_name  
    {BEFORE | AFTER} { event }  
    ON table_name  
    [FOR [EACH] { ROW | STATEMENT }]  
    EXECUTE PROCEDURE trigger_function
```
- ```
DROP TRIGGER [IF EXISTS] trigger_name ON table_name [CASCADE | RESTRICT];
```
- ```
ALTER TRIGGER trigger_name ON table_name RENAME TO new_trigger_name;
```
- ```
ALTER TABLE table_name DISABLE TRIGGER trigger_name | ALL;
```
- ```
ALTER TABLE table_name ENABLE TRIGGER trigger_name | ALL;
```
